Prepared media plate

Easy PlateTM YM-R

-Rapid type for Yeast and Mold

Molded Salami

- Easy Plate YM-R

48 hours incubation

- PDA Medium

120 hours incubation

*Data is provided by Center for Fungal Consultation, incorporated nonprofit organization

Colonies are clearly colored in 48 hours.
Shorter incubation time than agar media!
Colonies develop a purple color, making it easy to identify and count colonies even in the presence of food residues.

• Interpretation

Colored as purple colonies

If you want to distinguish between yeast and mold, please refer to the following.

Yeast: Colonies are small circle and have defined edges.

Mold: Colonies are large and have diffuse edges.

Product Code: 61977

Incubation temperature: 25°C±1

Incubation time: 48±2 hours

*If coloration is unclear, perform an additional 24-hours incubation

Storage condition (Unopened) 2-8°C

Shelf life: 18 months after manufacturing date

how to use

Example colonies of **48 hours** incubation

Foods

Dressing
+*Wickerhamomyces
anomalus*

Mixed powder

Egg powder
+*Aspergillus niger*

Sweet

Strains

*Aureobasidium
pullulans*

*Zygosaccharomyces
rouxii*

*Geotrichum
candidum*

*Aspergillus
flavus*

*Data is provided by Center for Fungal Consultation, incorporated nonprofit organization

• Excellent media performance

High correlation with agar media has been confirmed for a wide variety of foods

*Data is provided by Center for Fungal Consultation, incorporated nonprofit organization

• Easier-to use

Simply close the cover film and the sample suspension spreads evenly across the plate surface -without the need to use a plate spreader.

The plate surface is also surrounded by a unique hydrophobic resin ring to control the sample suspension and prevent leaks.

Easy Plate Series

Easy Plate AC - Aerobic Bacteria
Easy Plate CC - Coliform
Easy Plate EC - *E. coli*/ Coliform
Easy Plate SA - *S. aureus*
