

CleanTrust Pipette Swab

► Integrated design

Combines buffer, sampling swab, sample tube, and transfer function into one system, enabling sampling and sample transfer in a single step to improve efficiency.

► Quantitative transfer

Graduated tube with a dropper-style cap allows accurate dispensing of a defined sample volume onto test devices or agar plates.

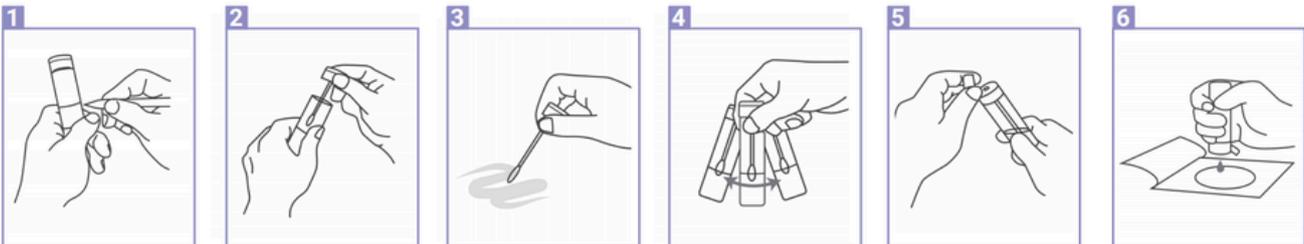

► High sample release

The enlarged degreasing cotton swab head facilitates efficient sample release, improving sample utilization.

► Enhanced safety

Sampling and sample release are performed entirely within a closed tube, reducing contact and cross-contamination risks.

Operating Instructions

Product Information

Product ID	Product Name	Buffer Solution	Specs
CT-PBS2510P	Pipette Swab PBS	Phosphate Buffered Saline, 10 mL	10 pcs/box
